INTERNAL SCORING RUBRIC - Senior Product Owner (Job ID: DJ-204)

SCORE SCALE

Scores are reported on a 0-100 scale with three criterion-referenced rating bands: strong_match (70-100), possible_match (40-69), and low_match (0-39). These bands align with the scoring pipeline's own thresholds, so the rubric and the scorer apply the same cut points.

MANDATORY REQUIREMENT

All mandatory conditions are required. A candidate missing any of them should not be rated above possible_match, and the score should not exceed 60.

- At least 4 years of experience as a Product Owner or Business Analyst in software projects.
- Experience gathering requirements and writing requirements documentation (for example diagrams, UML or BPMN).
- Hands-on experience with Agile methodologies (Scrum, Kanban or SAFe).

PREFERRED CRITERIA

- Understanding of the software development lifecycle
- Knowledge of business analysis practices and solution assessment
- Experience in the finance software domain
- Fluent English

BASIS

Mandatory and preferred criteria are derived directly from the posted job requirements for this role.
