INTERNAL SCORING RUBRIC - DevOps Engineer (Job ID: DJ-206)

SCORE SCALE

Scores are reported on a 0-100 scale with three criterion-referenced rating bands: strong_match (70-100), possible_match (40-69), and low_match (0-39). These bands align with the scoring pipeline's own thresholds, so the rubric and the scorer apply the same cut points.

MANDATORY REQUIREMENT

All mandatory conditions are required. A candidate missing any of them should not be rated above possible_match, and the score should not exceed 60.

- Hands-on experience with AWS.
- Experience with Python.
- Experience with Docker.

PREFERRED CRITERIA

- Experience with AWS CDK
- Experience with CI/CD pipelines
- Linux and Bash scripting
- Monitoring with Amazon CloudWatch or Grafana
- Familiarity with ITIL or ITSM practices

BASIS

Mandatory and preferred criteria are derived directly from the posted job requirements for this role.
