INTERNAL SCORING RUBRIC - Junior UI/UX Designer (Job ID: DJ-208)

SCORE SCALE

Scores are reported on a 0-100 scale with three criterion-referenced rating bands: strong_match (70-100), possible_match (40-69), and low_match (0-39). These bands align with the scoring pipeline's own thresholds, so the rubric and the scorer apply the same cut points.

MANDATORY REQUIREMENT

All mandatory conditions are required. A candidate missing any of them should not be rated above possible_match, and the score should not exceed 60.

- At least six months of design experience, or completed design courses.
- Strong knowledge of Figma and Adobe tools (Photoshop, Illustrator).
- Experience working with a design system and components.

PREFERRED CRITERIA

- Experience creating icons and illustrations for websites
- Understanding of basic UX design principles
- Understanding of basic HTML/CSS
- Experience with After Effects

BASIS

Mandatory and preferred criteria are derived directly from the posted job requirements for this role.
